**DETAILED ACTION**

***Terminal Disclaimer***

1. The terminal disclaimer filed on 12/26/2006 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of copending applications Nos. 10/845829 and 10/730671 has been reviewed and is accepted. The terminal disclaimer has been recorded.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Gushue, Registration No. 59,819, on 03/09/2007.

**The application has been amended as follows:**

Claim 33. Cancelled

Claim 34. Cancelled

Claim 35. Cancelled

Claim 36. Cancelled

Claim 37. Cancelled

**END OF AMENDMENT**

***Allowable Subject Matter***

3. Claims 1, 3-30, and 32 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The present application teaches system and method for coordinating the use of beam forming between a base station and a WTRU comprising selecting one of the base station and the WTRU for reduction of the amount in which the selected base station or WTRU will adjust its beam in response to misalignment between beams emanating from the base station and the WTRU; measuring an error in the alignment and determining a correction factor based on the measured error and adjusting the beam of the selected base station or WTRU using a selected adjustment parameter in accordance with the correction factor, whereby the beams emanating from the base station and the WTRU are aligned with respect to each other.

The closest prior art to the present application such as Etkin et al. teaches two beams from two communicating entities, but just an effect of beam sweeping by the base station. Etkin fails to disclose a scheme of measuring an error in alignment of two beams emanating from two communication entities, determining a correction factor based on the measured error, and readjusting the beams to realign the two beams. Etkin two communicating entities do not communicate during the initial state before forming operation and throughout the communication process. Etkin entities do not know whether the other is adjusting a beam direction for fixing the misalignment of the two beams.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
